Overall Length:

2.130 inches

Overall Width:

1.750 inches

End Application:

Pre-provisioning for which navicp phil acts as poe; aircraft

Criticality Code Justification:

Agav

Product Name:

Manual overfide release handle clip

Special Features:

Qmatl is 0.020 in. Thick cres 17-7ph iaw ams 5528, annealed and heat treated iaw ams 2759/3, rh950, formed from flat 90 degree triangular stock with legs rounded, 1st leg is 3.030 in. Long before looping back and 2.130 in. Long after looping with radius of 0.160 in, leg bends upward from loop to 33 deg. Angle from base, 0.290 in. From looped end; 2nd leg is 2.700 in. Long before looping, 1.750 in. After, this leg bends upward to 33 deg. Angle, 0.350 in. From looped end

Material:

Stainless steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
