Gripping Accommodation Type:

Knurled

System For Which Designed:

Pressurized

Retaining Device Type:

Chain

Pressure Relief Method:

Manual

Maximum Working Pressure:

50.000 pounds per square inch

Features Provided:

Submersible

Criticality Code Justification:

Feat

Product Name:

Cap, filter opening

Special Features:

This item is a flight safety critical aircraft part (fscap).

Material:

Aluminum alloy

Surface Treatment:

Anodize

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A083a0
