End Application:

F-16 aircraft

General Description:

C/rod end machining p/n 3833204-7; retaining type i compound p/n mil-r-46082; make from f-3833204-1; passivate per mp-22; magnetic inspect per mp-35, class b; heat treat to mil-h-6875, age at 1050 degrees f for 4 hours; record serial number of coated self-augning bearing to serial number of the finished assembly

Type/model Designation:

F-16a/b, tail effective type 61 0143 9999

Fsc Application Data:

Aircraft accessory equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
