**Body Length:**

14.860 inches

**Body Width:**

4.440 inches

**End Application:**

Boeing 757

**Product Name:**

Pneumatic door actuator

**Special Features:**

Function is emergency door actuation; weight is 2.25 pounds; operation pressure is 2800 psig.; proof pressure is 1020 psig.; burst pressure is 2040 psig.; temperature range is negative 65 degf to 160 degf; normal actuator load is 3900 pounds; limit actuator loads is 4900 pounds; ultimate actuator load is 7440 pounds

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A524x0
