Aircraft Mechanical Actuator - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/1680-01-523-5693

Body Length:
14.860 inches
Body Width:
4.440 inches
End Application:
Boeing 757
Product Name:
Pneumatic door actuator
Special Features:
Function is emergency door actuation; weight is 2.25 pounds; operation pressure is 2800 psig.; proof pressure is 1020 psig.; burst
pressure is 2040 psig.; temperature range is negative 65 degf to 160 degf; normal actuator load is 3900 pounds; limit actuator loads is
4900 pounds; ultimate actuator load is 7440 pounds
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A524x0
