Body Length:

14.860 inches

Body Width:

4.440 inches

End Application:

Boeing 757

Product Name:

Pneumatic door actuator

Special Features:

Function is emergency door actuation; weight is 2.25 pounds; operation pressure is 2800 psig.; proof pressure is 1020 psig.; burst pressure is 2040 psig.; temperature range is negative 65 degf to 160 degf; normal actuator load is 3900 pounds; limit actuator loads is 4900 pounds; ultimate actuator load is 7440 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A524x0
