Current Type:

Dc

Operating Speed At Rated Capacity In Rpm:

250.0 and 540.0

Maximum Operating Altitude Rating:

6000.0 feet

Shaft Rotation Direction:

Clockwise and counterclockwise

Duty Cycle:

Intermittent

Braking Method:

Electric

Intermittent Operation Duty Cycle:

1.0 minutes off and 5.0 minutes off

Voltage In Volts:

24.0 and 29.0

Special Features:

Used on the forward airstairs door of the boeing 737

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A30500
