Overall Length:

4.250 inches

Overall Diameter:

7.497 inches

Criticality Code Justification:

Text

Product Name:

Piston damper, damper sheave

Special Features:

Procuring activity take note: to ensure procuring activity has the latest drawing revisions, specifications and quality assurance requirements, a technical drawing review (tdr) is required prior to procurement

Functional Description:

Internal diameter: 5.250, 8 holes equally spaced, .312-24unf-3b, tap drill 1.25" max, hole diameter: 0.015"

Material:

Copper alloy

Special Test Features:

Material shall be alloy c95500ht (heat treated) iaw astm b148 (sand cast), astm b271

Test Data Document:

05047-asme y14.5m-1982 standard (includes industry or association standards, individual manufactureer standards, etc.). And 96906-mil-std-2035 standard (includes industry or association standards, individual manufactureer standards, etc.). And 81346-e1417 type 1, method a, sensitivity level 2 standard (includes industry or association standards, individual manufactureer standards, etc.).

General Description:

Item is used as part of a system supporting the launch and/or recovery of aircraft

Thread Size And Series/type Designator:

-3b unf

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
