Product Name:

Model 34 retrieve drive assembly

Special Features:

Consists of a horizontally mounted 10 hp electric motor coupled through a flexible coupling to a 50: 1 reduction gear box. A pulley mounted on a gearbox vertical output shaft serves as the drive side attaching point for the endless drive belt. A removable lever arm is mounted on top of the pulley shaft using a bronze bearing to absorb the friction load. The motor is controlled by a start/stop switch. A protective cover is provided to shelter the components from the elements

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
