Special Features:

External power source; maximum voltage rating in volts 250.0 dc; current rating in amps 3.0; intelligence data handling capability - heading correction receiving automatic; indication method - receiving electrical digital display; inclosure type - partially enclosed; sensing element type and location - thermistor remote; panel mounting method

Fsc Application Data:

Landing/wave off system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
