Lift Mechanism Type:

Hydraulic

Wheel Quantity:

4

Tire Type:

Pneumatic

Specific Use:

Designed to transport the mlg, either complete or in various stages of completion

Drawbar Characteristic:

Fixed

Integral Lifting Device:

Included

Wheelbase Length:

162.500 inches

Special Features:

Weight - 3000 lbs; height - 60 in.; length - 265 in.; width - 130 in.; manual input requirement; method of coupling is yoke support assembly; rated capacity 7890 to 15980 lbs; type of control - manual; transportation data - towable or common carrier; prime mover type - tug or tractor; lifting arrangement - vertical; body type - twin i beam trailer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T277-r
