Overall Length:

44.000 inches

Overall Width:

44.000 inches

End Application:

E-4a, -4b aerospace ground support equipment

Functional Description:

The shf satcom antenna handling fixture consists essentially of four steel beams which bolt together and support the antenna in an upright position during handling. Shackles are provided on the two outside beams for attachment of two nylon web slings. Rubber padding covers the beams and tie bolts on those surfaces that contact the antenna.

Reference Data And Literature:

To 33d-1-111, -114

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
