End Application:

E-3a acft

Special Features:

The monorail support assembly consists of a removable i-beam monorail bolted at one end to an upright inverted t-support which rests on the aircraft floor. The opposite end of the monorail is bolted to a two-piece, upright support which rests on top of the e33 rack

Functional Description:

Used to support the maritime magnetic tape transport, when suspended from the monorail trolley, during installation or removal of the magnetic tape transport from the mtt recorder e33 rack. The monorail support assembly is used in conjunction with monorail yoke assembly, part number 204-90031- 1; hlu-254/e monorail trolley, part number 204-90024-1; and mtt adapter set, part number 204-90061-1

Reference Data And Literature:

To 35-1-251-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
