Overall Length:

253.000 inches

Diameter:

13.000 inches

Wheel Quantity:

2

Tire Type:

Solid rubber

Design Type:

Nose gear

Towed End Connection Type:

Tongue w/locking pin

Towing End Connection Type:

Eye hook

Length Adjustability:

Nonadjustable

Functional Description:

Used to move b-1b aircraft to different ground positions without operating aircraft engines

Relationship To Similar Equipment:

Functionally similar to ftgse mel la0000.30

Supplementary Features:

Jrated capacity: 59, 250 pds.; prime mover type: mb-2 or alternate towing; braking system: none, only on tow vehicle; steering type: tow vehicle; maximum towing speed: 3 to 5 miles per hour; prime mover type: vehicle

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T268-a
