End Application:

B1-b aircraft age.

Safe Operating Load Rating:

150.000 pounds

Design Type:

Hoist

Operation Method:

Manual

Lifting Mechanism:

Included

Support Assembly Method:

Bolted

Support Material Cross-sectional Shape:

Irregular

Support Construction:

Rigid

Support Height Adjustability:

Nonadjustable

Sling:

Not included

Hoisting Adapter:

Included

Functional Classification:

Hh-1.1

Functional Description:

Used to position/raise/lower line replaceable units in fuselage side faring bay

Supplementary Features:

C/o hoist and container; hoisting device c/o load platform, chain, sprocket assembly's, line replaceable unit adapters, chain sprocket ratchet, three segments roller chain

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T244-c
