End Application:

B1-b aircraft age.

Design Type:

Stand

Functional Classification:

Hh-1.5

Special Features:

Dsteel frame, contoured support pads, 3 point adjustment for wing alignment, elevated platforming, hand-operated hydraulic jack, load cells for pivot bearing unloading, retractable casters, air glide pads

Functional Description:

Used for leveling and support of wings during wing pivot nondestructive inspection, wing removal and replacement

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T361-a
