Overall Length:

40.000 inches

Attachment Method:

Threaded

Usage Design:

Weapons system component

Functional Classification:

Gg-5.5

Functional Description:

Used to position selector valve for pin extraction and insertion flow positions; provide new positive attachment couplings; provide separate adapters for hydraulic actuator pump used onb-52g cruise missile

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A30600
