End Application:

F-22 aircraft

Special Features:

Composed of a pair of wire rope assemblies. Each wire rope assembly consists of a wire rope with a flemish clevis with a shear pin connection, another wire rope with a flemish loop and thimble which passes through the eye of a sling hook and polyester loop. A safety cable is provided across the shear pin connection to prevent spring back of the wire rope assemblies. Used for towing aircraft during emergency towing when a towbar cannot be used.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:
