Frame Material:

Steel

Lift Mechanism Type:

Hydraulic

Wheel Quantity:

4

Tire Size:

6.00-9

Tire Type:

Pneumatic

Position Quantity:

0

Wheel Diameter:

9.000 inches

Lifting Capacity:

8000.0 pounds

Features Provided:

Parking brakes and rails and stabilizing jack and towing pintle hook

Drawbar Type:

Pole

Height Adjustment Range:

+31.500/+89.000 inches

Drawbar Characteristic:

Fixed

Integral Lifting Device:

Not included

Frame Construction:

Bolted and welded

Wheelbase Length:

126.000 inches

Functional Classification:

Hh-1.5

Functional Description:

Installation/removal of aircraft and missile engine

Reference Data And Literature:

T.O. 35d3-3-34-4

Type/model Designation:

4000a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T277-r
