Overall Length:

360.000 inches

Overall Width:

80.000 inches

Frame Material:

Steel

End Application:

C-17 aircraft

Lift Mechanism Type:

Mechanical

Tire Size:

6.00-9

Tire Type:

Pneumatic

Specific Usage Design:

To interface with wing panel assembly secondary barrier for installation and removal

Lifting Capacity:

2000.000 pounds

Integral Lifting Device:

Included

Frame Construction:

Welded

Functional Classification:

Hh-1.5

Special Features:

Must be capable of connecting to the flight line tow vehicle manual release pintle hook assembly. Operating temperature -20 degrees f to 125 degrees f

Reference Data And Literature:

Serd 460213, contract no f33657-97-c-0008 nomenclature, trailer, secondary barrier-wing installation and removal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T277-r
