Overall Length:

18.000 inches

Overall Height:

44.000 inches

Overall Width:

24.000 inches

Attachment Method:

Bolted

Usage Design:

Aircraft engine

Functional Classification:

Gg-7.1

Functional Description:

Used in conjunction w/serd 010112self propelled servicing platform to perform tasks under the engine cowl

Material:

Aluminum alloy

Material:

Aluminum alloy

Entry Date:

03-05-05

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A30600
