End Application:

P-3 acft

Wheel Quantity:

3

Special Features:

Used to service landing gear strut/shock-fills the shock strut to the proper level with micronically filtered hydraulic fluid and inflated the strut with dehydrated nitrogen to achieve the proper extension-system includes a electric engine driven high pressure pump with pressure compensator, micronic filters, 1-40 gal fresh oil tank, 1-40 gal. Waste oil tank, 40 ft of high pressure hone on 2 retractable hose reels-can be towed by vehicle at no more than 10 mph

Functional Description:

Serd no. 10861

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T277-r
