End Application:

Hoist axle beam assembly

Design Type:

Hoist

Operation Method:

Manual

Lifting Mechanism:

Not included

Support Height Adjustability:

Adjustable

Sling:

Included

Hoisting Adapter:

Included

Special Features:

Upper hook assembly made of al 8in long 4in wide 2 ht, with delrin pads, lower hook assembly made of al 40 in long 9 in w 8 in ht, beam assembly made of al 40 in long 4 in w 4 in ht, load cell is .5 in diameter 8000 lbs maximum machanical dynamometer with accuracy +0.5% of capacity.

Forged steel shackle in each end, the swivel shackle will aid in avoiding interference with the mlg assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T244-c
