Mounting Crossbeams:

Not included

Piston Displacement:

Between 4300.0 cubic centimeters and 5700.0 cubic centimeters

Outboard Drive Lubrication Method:

Forced feed

Outboard Drive Steering Mechanism Operating Method:

Gear and level controlled hydraulic motor

Outboard Drive Locking Brake:

Not included

Outboard Drive Protective Skeg:

Not included

Brake Power Rating:

400.0 horsepower

Product Name:

Bravo iii drive

Special Features:

Protective anodes on anti-cav plate and prop-shaft; power trim memory; greasable drive coupler; cone clutch; all components are xk-360 aluminium alloy; audio warning system for low oil pressure, high engine temp, and low drive lub; built in speedometer; 28 degrees range of drive motion; shot-peened gears; trim limit switch

Fuel Type:

Gasoline

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T274-a
