Cylinder Quantity:

6

Starting Method:

Electric

Cooling Type:

Direct water

Piston Displacement:

2.6 cubic inches

Outboard Drive Steering Mechanism Operating Method:

Steering wheel

Product Name:

Engine, outboard, 225hp

Special Features:

Full throttle rpm 5800-6400, air induction system supercharged with charge air cooling and electronic boost pressure, alternator amp 70 amp/82 watt (belt driven) steering electro-hydraulic power steering, engine protection operator warning system, smartcraft engine guardian. Recommended fuel: 92 octane recommended, 87 octane compatible (up to 10 percent ethanol)

Fuel Type:

Gasoline

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T274-a
