**Cylinder Quantity:**

6

**Starting Method:**

Electric

**Cooling Type:**

Direct water

**Piston Displacement:**

2.6 cubic inches

**Outboard Drive Steering Mechanism Operating Method:**

Steering wheel

**Product Name:**

Engine, outboard, 225hp

**Special Features:**

Full throttle rpm 5800-6400, air induction system supercharged with charge air cooling and electronic boost pressure, alternator amp 70 amp/82 watt (belt driven) steering electro-hydraulic power steering, engine protection operator warning system, smartcraft engine guardian. Recommended fuel: 92 octane recommended, 87 octane compatible (up to 10 percent ethanol)

**Fuel Type:**

Gasoline

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T274-a
