End Application:

Schottel bow thruster onboard 378 ft whec cg vessels

End Item Design Control Activity:

32862

Rudder Height:

43.279 inches

Special Features:

Matl aluminum bronze astm b148 c1-9b; two identical units flanged at both ends; each flange 1.093 inch thick; diameter 7.250 inches; drilledtapped for 4 holes 0.750-10 unc standard thd; each flange welded to oval shaped aluminum bronze bar 41.093 inches long units function as balancing rudders

Material:

Copper alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A511y0
