Maximum Operating Pressure:

3000.000 pounds per square inch

End Application:

Control unit; w/s: usns stalwart class tagos

Maximum Fluid Volume:

4.000 gallons

Separator Type:

Piston

Special Features:

bore: 6 in. (actual: 5 3/4 in.); type of construction: threaded both ends, non-asme material, 3000 psi fatigue tested design; capacity: 4 gal.; standard port: sae no 24

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T164-c
