Leaf Spring Assembly - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/2510-00-287-5699

Material Hardness Rating:
Between 41.0 rockwell c and 45.0 rockwell c
Design Type:
Mainspring
Spring Deflection Rate:
200.000 pounds per inch
Elliptic Shape:
Quarter
Spring Length Under Load:
Between 15.750 inches and 15.813 inches
ndividual Leaf Type Designation:
Leaf no.1 main spring
Special Features:
ndividual leaf type/style designation: mainspring leaf no.2 to 7, style no. 16; thickness at bolt hole center 1.515 in. Nom; width at bolt hole
center 1.75 in. Nom; aa end length under load to bolt hole center 15.75 min 15.813 maximum in.; aa end eye inside diameter without
oushing 0.625 in. Nom; aa end width at eye 1.75 in. Nom
Material:
Steel comp 9260
Material Specification:
Qq-s-624, amend 2, fs9260 federal specification single material response
Shelf Life:
N/a
Unit Of Measure:
-
Demilitarization:
Yes - demil/mli
Filg:
402900
