Special Features:

Assembly consists of two halves with internal springs. Total length is 26.250 in., diameters of the two halves are 1.500 in. And 2.000 in.

Respectively; inner spring is passivated stainless steel, 105 active coils of 0.091 in diameter wire. Coil diameter is 0.500 in., stressed length is 18.500 in.; outer spring, passivated stainless steel, 70 active coils of 0.135 in. Diameter wire. Coil diameter is 0.812 in. Unstressed length is 18.5500 in.; spring housing, upper shock insulator. Dilrin, 1.500 in. O/d x 9.000 in. Length hollowed to 0.844 in.
