**Spline Major Diameter:**

1.762 inches

**Outside Diameter:**

15.240 inches

**Spline Quantity:**

10

**Design Type:**

Wet

**Spline Type:**

Straight

**Disk Type:**

Plain

**Construction:**

Solid

**Disk Material:**

Steel

**Special Features:**

Bronze friction material, dimensions in inches: inside diameter (dia) 2.375 i, minor diameter 1.440 , length 1.385, thickness .105, material thickness .125, material location both sides, friction material facing included, material inside diameter .660, riveted facing attachment, integral hub included, .90 flywheet fact to rear of hub, bolt hole not included

**Flexibility:**

Rigid

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A521p0
