Spline Major Diameter:

1.762 inches

Outside Diameter:

15.240 inches

Spline Quantity:

10

Design Type:

Wet

Spline Type:

Straight

Disk Type:

Plain

Construction:

Solid

Disk Material:

Steel

Special Features:

Bronze friction material, dimensions in inches: inside diameter (dia) 2.375 i, minor diameter 1.440 , length 1.385, thickness .105, material thickness .125, material location both sides, friction material facing included, material inside diameter .660, riveted facing attachment, integral hub included, .90 flywheel fact to rear of hub, bolt hole not included

Flexibility:

Rigid

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A521p0
