Spline Major Diameter:
1.750 inches
Outside Diameter:
13.750 inches
Material Thickness:
0.187 inches
Spline Quantity:
10
End Application:
HARN-IS-CHF-EGER
Design Type:
Dry
Material Location:
Both sides
Design Form:
Solid
Spline Type:
Straight
Material Outside Diameter:
13.750 inches
Material Inside Diameter:
7.375 inches
Facing Attachment Method:
Facing Attachment Method: Riveted
_
Riveted
Riveted Features Provided:
Riveted  Features Provided:  Friction material facing
Riveted  Features Provided:  Friction material facing  Construction:
Riveted  Features Provided: Friction material facing  Construction: Solid
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility:
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility: Rigid
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility: Rigid Material:
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility: Rigid Material: Steel
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility: Rigid Material: Steel Shelf Life:
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility: Rigid Material: Steel Shelf Life: N/a
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility: Rigid Material: Steel Shelf Life: N/a Unit Of Measure:
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility: Rigid Material: Steel Shelf Life: N/a Unit Of Measure:
Riveted  Features Provided: Friction material facing  Construction: Solid Flexibility: Rigid Material: Steel Shelf Life: N/a Unit Of Measure: Demilitarization:
