Spline Major Diameter:

1.500 inches

Spline Quantity:

10

Design Type:

Dry

Features Provided:

Riveted facing

Construction:

Solid

Disk Material:

Steel

Special Features:

Ospline diameter 1.221 in. Min. 1.227 in. Max.; length 1.750 in. Nom., thickness 0.125 in. Nom., material thickness 0.156 in. Nom.; material location both sides; solid design form; friction material facing included; molded aasbestos composition type; material inside diameter 7.000 in. Nom., material outside diameter 13.000 in. Nom., facing ggroove included; damper spring q type 10; integral hub included; distance from from flywheel face to rear of hub 1.500 in. Nom., flexible

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A521p0
