Fabrication Method:
Molded
Strengthening Feature:
Internally molded-in reinforcement
End Application:
3805-00-051-9359
Segment Quantity:
1
Drum Diameter For Which Designed:
17.000 inches
Features Provided:
Friction lining
Surface Condition And Location:
One side ground
Drum Width For Which Designed:
4.000 inches
Actuation Method And Location:
Hydraulic cylinder external
Supplementary Features:
This item has been reviewed for asbestos material. The current approved sources 78500 have indicated their part number contained
asbestos prior to 1984. They continue to manufacture the same part number without asbestos material after 1984
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A230a0
