Fabrication Method:

Molded

Strengthening Feature:

Internally molded-in reinforcement

End Application:

3805-00-051-9359

Segment Quantity:

1

Drum Diameter For Which Designed:

17.000 inches

Features Provided:

Friction lining

Surface Condition And Location:

One side ground

Drum Width For Which Designed:

4.000 inches

Actuation Method And Location:

Hydraulic cylinder external

Supplementary Features:

This item has been reviewed for asbestos material. The current approved sources 78500 have indicated their part number contained asbestos prior to 1984. They continue to manufacture the same part number without asbestos material after 1984

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A230a0
