Fabrication Method:

Compressed

Width:

2.250 inches

Overall Length:

5.688 inches

Thickness:

0.125 inches

Hole Arrangement Style:

Double even

Strengthening Feature:

Interwoven wire

Lining Style:

Rectangular block plain

Application Type:

Dry

Hole Type And Quantity:

8 counterbored

Features Provided:

Rigid friction lining

Surface Condition And Location:

One side ground

Attachment Method:

Riveted

Supplementary Features:

This item has been reviewed for asbestos material; the current approved sources, 28718 have indicated their part number contained asbestos prior to 1984, they continue to manufacture the same part number without asbestos material after 1984

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A230a0
