**Fabrication Method:**

Molded

**Application Type:**

Dry

**Segment Quantity:**

1

**Drum Diameter For Which Designed:**

6.000 inches

**Features Provided:**

Friction lining

**Surface Condition And Location:**

One side ground

**Drum Width For Which Designed:**

1.500 inches

**Actuation Method And Location:**

Lever external

**Supplementary Features:**

This item has been reviewed for asbestos material; the current approved sources; 05415 have indicated their part number contained asbestos prior to 1984; they continue to manufacture the same part number without asbestos material after 1984

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A230a0
