Fabrication Method:

Molded

Application Type:

Dry

Segment Quantity:

1

Drum Diameter For Which Designed:

16.250 inches

Features Provided:

Friction lining

Surface Condition And Location:

One side ground

Drum Width For Which Designed:

3.875 inches

Actuation Method And Location:

Hydraulic cylinder internal

Supplementary Features:

This item has been reviewed for asbestos material. The current approved sources 11083 have indicated their part number contained asbestos prior to 1984. They continue to manufacture the same part number without asbestos material after 1984

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A230a0
