Fabrication Method:

Molded

End Application:

Truck u.S.Army tank automotive command, model m260a1 and m262a2

Friction Lining Material:

Asbestos composition

Application Type:

Dry

Segment Quantity:

1

Drum Diameter For Which Designed:

15.500 inches

Features Provided:

Friction lining

Surface Condition And Location:

One side ground

Drum Width For Which Designed:

3.000 inches

Actuation Method And Location:

Hydraulic cylinder internal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A230a0
