Fabrication Method:

Molded

Width:

4.000 inches

Thickness:

Between 0.740 inches and 0.760 inches

Hole Arrangement Style:

Double even

Friction Lining Material:

Asbestos composition

Lining Style:

Segment plain

Arc Length:

Between 8.761 inches and 8.771 inches

Minor Radius:

7.875 inches

Application Type:

Dry

Hole Type And Quantity:

8 counterbored

Features Provided:

Rigid friction lining

Surface Condition And Location:

One side ground

Attachment Method:

Riveted

Special Features:

Counterbore on outer arc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A230a0
