**Fabrication Method:**

Molded

**Strengthening Feature:**

Internally molded-in reinforcement

**Application Type:**

Dry

**Segment Quantity:**

1

**Drum Diameter For Which Designed:**

13.000 inches

**Features Provided:**

Friction lining

**Surface Condition And Location:**

One side ground

**Drum Width For Which Designed:**

2.250 inches

**Actuation Method And Location:**

Hydraulic cylinder external

**Special Features:**

Shoe 14.750 in.Dia, 5.000 in.Radius, lining 14.125 in.Lg /bonded/, 2.500 in. Wide

**Supplementary Features:**

This item has been reviewed for asbestos material. The current approved sources 05415 have indicated thier part number contained asbestos prior to 1984. They continue to manufacture the same part number without asbestos material after 1984

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A230a0
