Fabrication Method:

Molded

Application Type:

Dry

Segment Quantity:

1

Drum Diameter For Which Designed:

11.750 inches

Features Provided:

Friction lining

Surface Condition And Location:

One side ground

Drum Width For Which Designed:

5.000 inches

Actuation Method And Location:

Lever internal

Special Features:

5.375 in. O/a h

Supplementary Features:

This item has been reviewed for asbestos material; the current approved sources; 11083 have indicated their part number contained asbestos prior to 1984, they continue to manufacture the same part number without asbestos material after 1984

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A230a0
