Width:

Between 6.969 inches and 7.031 inches

Thickness:

Between 0.760 inches and 0.780 inches

Hole Arrangement Style:

Double even

Friction Lining Material:

Iron, sintered

Lining Style:

Segment plain

Arc Length:

Between 10.133 inches and 10.153 inches

Minor Radius:

9.250 inches

Application Type:

Dry and oil

Hole Type And Quantity:

6 countersunk

Features Provided:

Rigid friction lining

Attachment Method:

Riveted

Special Features:

Countersunk on outer arc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A230a0
