Fabrication Method:

Molded

Application Type:

Dry

Segment Quantity:

1

Drum Diameter For Which Designed:

12.500 inches

Features Provided:

Friction lining

Surface Condition And Location:

One side ground

Drum Width For Which Designed:

4.000 inches

Actuation Method And Location:

Lever internal

Special Features:

Asbestos free; the material safety data sheet has been reviewed by the hmirs office and was determined to be asbestos free

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A230a0
