Product Name:

Master cylinder power unit

Special Features:

Brake line pressure: 0 to 1500; power cylinder bore diameter: 1.75 in/1.000 in; power cylinder fluid displacement: 1.1 to 2.2 in; push rod force with boosted power: 470 lb; booster pressure differential at brake line pressure: 135 psi @ 8 gpm; master cylinder fluid: bf

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
