Outside Diameter:

67.8 millimeters

Overall Diameter:

55.6 millimeters

End Application:

2320-01-522-1859, truck, dump

Sealing Length:

29.5 millimeters

Retaining Device Type:

Chain

Retaining Device Length:

304.0 millimeters

Product Name:

Cap, filler opening

Material:

Steel body

Material Specification:

Astm e380. Method b assn standard 1st material response body and rubber compound iaw sae j200. Grade 2 assn standard 2nd material response body

Surface Treatment:

Chromate body and zinc body

Surface Treatment Specification:

Astm 8633, ty iii. Cl fe/zn 8 assn standard 1st treatment response body and 19207 12420325 for rubber compound mfr ref 2nd treatment response body

Style Designator:

Adjustable type-internal

Supplementary Features:

Nha-57k1971

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A083a0
