Application Design:

Aircraft tail wheel, type i smooth contour

Size Designation:

10

Body Material:

Rubber, natural

Inflation Device Type:

Tr12

Inflation Device Position:

Off center

Construction:

Regular

Base Construction:

Standard

Splice Minimum Rated Tensile Strength:

400 pounds per square inch

Operating Temperature Range In Deg Celsius:

-54.0/+93.0

Min. Tensile Strength (psi):

750 pounds per square inch

Specification Or Standard:

1 type and 2 class and a style

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A009a0
