Core Environmental Protection:

Heat resistant and corrosion resistant

Commercial Core Length Designator:

Standard

Spring Material:

Steel, stainless

Unit Package Quantity:

100

Unit Package Type:

Box

Size Designation:

Standard

Spring Tension Type:

High

Accessory Type:

Valve

Special Features:

Size designation meets tire and rim association specification: tr-c4. Special features slot in the head of the pin for identification

Specification Or Standard:

1 class and 5 type

Fsc Application Data:

Pneumatic tire

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T318-e
