Cross Sectional Shape:

Multi-piece scraper, convex face , w/expander

Ring Style:

Concentric

Radial Wall Thickness:

Between 0.2070 inches and 0.2170 inches

Overall Width:

0.1870 inches

Standard Bore Diameter:

3.625 inches

Joint Style:

Vertical joint

End Application:

3655-00-739-9514, generating plant, type a/m26a9

Material:

Steel comp 1065 or steel comp 1070

Material Specification:

66 federal standard all material responses

Surface Treatment:

Chromium outside periphery

Fsc Application Data:

Liquid oxygen generator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A08400
